Programming Practicum Report: Meeting #4

R. Ethan Halim

September 16th, 2024

1 Sum of Series

The entire source file is hosted on a GitHub repository **here**.

1.1 Explanation

The program is to compute the sum of an arithmetic series from 1 to n. Firstly, it requests user input for the value of `n`.

```
int program(std::istream& cin, std::ostream& cout) {
    int64_t n;
    cout << "Input: ";
    cin >> n;

    ...
}
```

$$\text{val} = \sum_{i=1}^{n}$$

The loop below calculates the sum of the arithmetic series, which is equivalent to the mathematical expression above, and prints the sum.

```
int program(std::istream& cin, std::ostream& cout) {
    ...

    int64_t val = 0;
    for (int64_t i = 1; i <= n; i++) {
        val += i;
```

```
    }

    cout << "Output: " << val << '\n';

    ...
}
```

The explanation to the sum is printed by another loop which at the same time formats the expanded sum of the arithmetic series. The loop iterates from 1 to `n` and prints them following the printing of `"(Explanation:"`. In the iterations from 1 to `n - 1`, `" + "` is appended to the explanation, as to generate something alike `"1 + 2 + ... + [n - 1] + [n] = [val]"`.

```
int program(std::istream& cin, std::ostream& cout) {
    ...

    cout << "(Explanation: ";
    // If it is equal or below zero, just print "0 = 0".
    if (n <= 0) {
        cout << "0";
    }
    for (int64_t i = 1; i <= n; i++) {
        cout << i;
        if (i != n) {
            cout << " + ";
        }
    }
    cout << " = " << val << ")\n";

    return 0;
}
```

1.2 Manual Testing

Below is the compilation and the testing of the source code.

```
avaxar@AvaxarTUF:~/Repos/uni-practica-1/week_4/01_sum$ make
g++ -Wall sum.cpp -o sum
./sum
Input: 15
Output: 120
(Explanation: 1 + 2 + 3 + 4 + 5 + 6 + 7 + 8 + 9 + 10 + 11 + 12 + 13 + 14 + 15 = 120)
```

1.3 Test Cases

1.3.1 Tests

Below is copied directly from the `tests.txt` file.

```
%INPUT
0
%OUTPUT
Input: Output: 0
(Explanation: 0 = 0)
%END

%INPUT

↪  + 61 + 62 + 63 + 64 + 65 + 66 + 67 + 68 + 69 + 70 + 71 + 72
↪  + 73 + 74 + 75 + 76 + 77 + 78 + 79 + 80 + 81 + 82 + 83 + 84
↪  + 85 + 86 + 87 + 88 + 89 + 90 + 91 + 92 + 93 + 94 + 95 + 96
↪  + 97 + 98 + 99 + 100 = 5050)
%END
```

1.3.2 Execution

Below are the results of the test cases. No test cases failed.

```
avaxar@AvaxarTUF:~/Repos/uni-practica-1/week_4/01_sum$ make clean
rm -f sum sum_test
avaxar@AvaxarTUF:~/Repos/uni-practica-1/week_4/01_sum$ make test
g++ -Wall -g sum.cpp -o sum_test -DTEST
./sum_test

[*] All tests passed.
```

2 Multiplication Table

The entire source file is hosted on a GitHub repository **here**.

2.1 Explanation

The code iterates from 1 to 10 using a for-loop and multiplies the given input `n` by the iterator `i`.

```cpp
int program(std::istream& cin, std::ostream& cout) {
    int64_t n;
    cout << "Input: ";
    cin >> n;

    cout << "\n[Multiplication Table]\n";
    for (int64_t i = 1; i <= 10; i++) {
        cout << n << " x " << i << " = " << (n * i) << '\n';
    }

    return 0;
}
```

2.2 Manual Testing

Below is the compilation and the testing of the source code.

```
avaxar@AvaxarTUF:~/Repos/uni-practica-1/week_4/02_multiplication$ make
g++ -Wall multiplication.cpp -o multiplication
./multiplication
Input: 7

[Multiplication Table]
7 x 1 = 7
7 x 2 = 14
7 x 3 = 21
7 x 4 = 28
7 x 5 = 35
7 x 6 = 42
7 x 7 = 49
7 x 8 = 56
7 x 9 = 63
7 x 10 = 70
```

2.3 Test Cases

2.3.1 Tests

Below is copied directly from the `tests.txt` file.

```
%INPUT
0
%OUTPUT
Input:
[Multiplication Table]
0 x 1 = 0
0 x 2 = 0
0 x 3 = 0
0 x 4 = 0
0 x 5 = 0
